**Subject:** 2008 BLM geophysical survey in Silverton

Larry,

Good talking with you. Attached is a brief geophysical survey I collected in Silverton back in 2008. The survey was part of a class being taught by BLM so the pptx is written to be educational. The objective was to delineate the local landfill/dump, but Stephanie Odell was confused to its location, so there are two overlapping survey locations. Also we were running out of time and rushed the completion of the EM survey so you will notice our EM survey lines began to wonder like a drunk sailor instead of being straight. let me know if you have any questions. thanks
